

# Mission to Serve

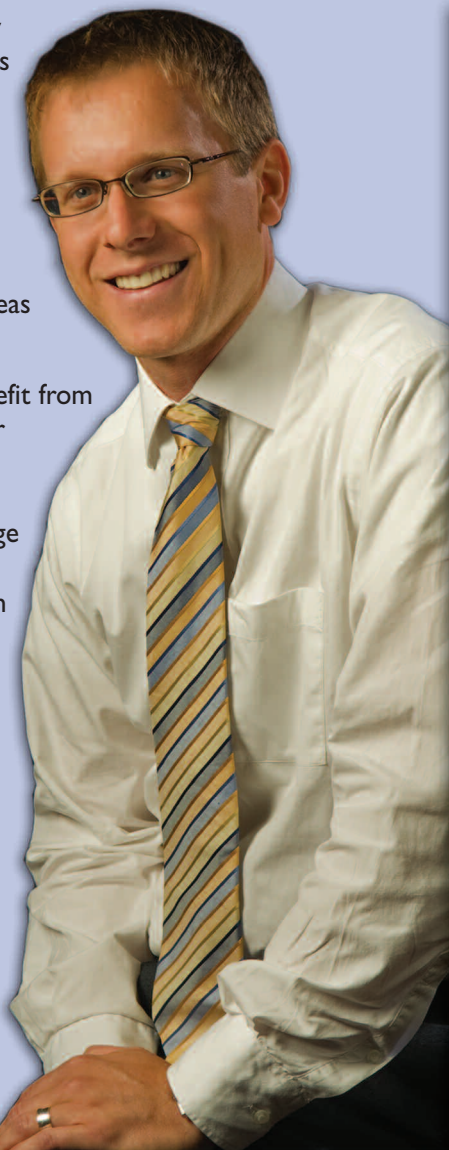

## Changing the concept of community wellness—one patient at a time.

Lots of people talk community wellness, but Dr. Aaron Dunn is a leader when it comes to making change happen. Instrumental in establishing Dodgeville's Community Connections Free Clinic, Dr. Dunn earned the respect of many by offering his energy, ideas and time to the project.

And while big initiatives benefit from his enthusiasm, Dr. Dunn never loses sight of the personal interaction that is key to the healing process. In a day and age when house calls are unheard of—it's not unusual to find him in a patient's kitchen—checking in to see how things are going.

"I enjoy working in a rural community hospital—from the emergency room to the birthing unit—I am able to help people when they need it most," explains Dunn. "And it's the random Thank-you's and small displays of appreciation that are the sweetest reward."

Dr. Dunn is just one of the many exceptional people at Upland Hills Health. Dedicated to meeting the healthcare needs in our community.

*Dr. Dunn practices at DEAN/Family Practice Associates in Dodgeville 935-3301 and Mineral Point 987-2391.*
