

# Profiles in Healing

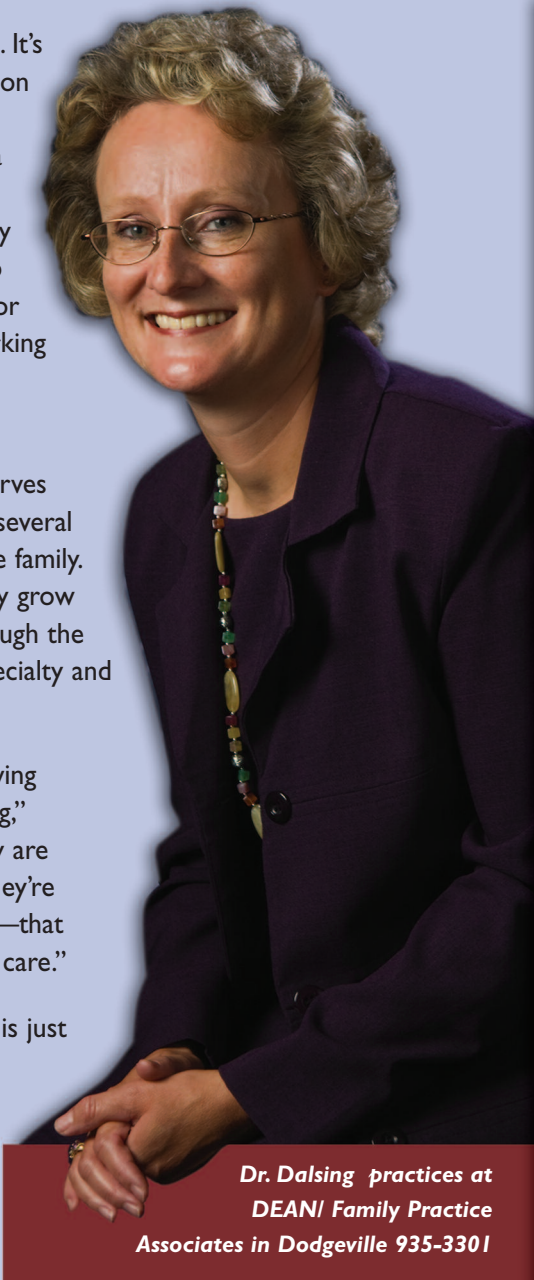

## Putting families first.

Faith in the family unit. It's motivated Dr. Dalsing on so many levels—as a sister, mother and as a physician. Born and raised on a small family farm, Kathryn grew up with an appreciation for working hard and working together.

Today Dr. Dalsing serves families—many times several generations in just one family. Serving families as they grow and helping them through the stages of life is her specialty and her passion.

“Working with growing families is so rewarding,” explains Dalsing. “They are more than patients. They're neighbors and friends—that deserve the very best care.”

Dr. Kathryn Dalsing is just one of the many exceptional physicians on the Upland Hills Health team. Dedicated to serving families in south west Wisconsin.
