

# Mission to Serve

## Poetic praise for a Doctor that delivers heartfelt care.

Not too many Doctors can claim to have inspired their patients to the point of poetry—but that's exactly what happened to Dr. Rachel Keith. This unique out-pouring of affection between patient and caregiver is the kind of rapport that makes a community hospital different.

A family practice physician, Dr Keith decided on health care as a career after eye-opening travels to Haiti and Kenya.

Witnessing desperate conditions and feeling helpless set Dr. Keith on a determined course to care for others through medicine.

"I get great satisfaction from caring for neighbors. Meeting patients at the local store and witnessing their progress is very rewarding," explains Keith. It's all part of the close knit community experience that Keith values as a physician and as a mom.

Dr. Keith is just one of the many exceptional people at Upland Hills Health. Dedicated to quality care and motivated by a mission to serve...we're neighbors caring for neighbors.
