

# Profiles in Healing

## Impacting generations with a neighborly approach.

Don't let Dr. Lindsey's down-to-earth manner fool you. He's a powerhouse when it comes to women's health and women's surgeries. Serving as an OB/GYN in southwest Wisconsin for nearly 30 years, Everett Lindsey has helped bring several generations into the world—assisting his “babies” to have babies.

Living a simple, independent lifestyle on a small family farm, Dr. Lindsey enjoys the basics of gardening and tilling the land. He applies the same honest approach and genuine human touch to his practice—earning him the respect of colleagues and patients alike.

“The trust patients place in you as a Doctor is awesome,” comments Lindsey, “A commitment to caring for the patient goes beyond a procedure or diagnosis. You have to care *about* them...not just care *for* them.”

Dr. Everett Lindsey is just one of the many exceptional physicians on the Upland Hills Health team. Dedicated to touching the lives of patients and their families.
