A basic facial is a series of treatments for the face, including steam, exfoliation, extractions, massage, masks, and moisturizer. Facials are used for general skin health as well as to treat specific skin concerns

Acne facial is very similar to a basic facial but it is customized to your specific skin type and acne concerns. May include extra steps to help clear blemishes, such as high frequency and red light therapy.

Dermaplaning is a technique using a medical grade scalpel to shave away the outermost layer of dead skin and hair.

A chemical peel is a technique used to improve and smooth the texture of the skin. Chemical peels are intended to remove the outermost layer of skin. May be done in a series or monthly for maintenance.

Eyebrow treatments allow you to change the shape of your brow and sets it into place. The treatment lasts 6-8 weeks.

A lash lift is used to define and curl your natural lashes. Lasts 4-6 weeks.

Cosmetic Services

Brow Tint	\$12
Eyelash Tint	\$12
Eyelash Lift	\$40
Brow Lamination	\$40

Add-On Services

High Frequency	\$12
Red Light Therapy	\$12

A high frequency device introduces oxygen into the skin, which kills bacteria. This helps in the treatment of acne and shrinks enlarged pores. It can also reduce the appearance of fine lines and wrinkles.

Red light therapy is a treatment that uses low wavelength red light to improve skin's appearance, such as reducing wrinkles, scars, redness and acne.
